

NOGBEDZI Yao Messan Mawuena

Software Engineer

Ouagadougou, Burkina Faso · +226 07 22 40 34 · hello@donilite.me · github.com/DoniLite · donilite.me

PROFILE

Self-taught, polyglot software engineer (Go, TypeScript, Rust), comfortable across mobile, backend, and self-hosted infrastructure. Active open-source contributor with a strong eye for polished products, from interface design to deployment.

WORK EXPERIENCE

Software Engineer — 2025 - present

Obaas Consult — Ouagadougou

- Designed a data collection, processing, and visualization platform, initially built to open up administrative-sector data to the public.
- Repositioned the product as a B2B offering, now sold to companies across industries.

Frontend Web Developer — 2022 - 2024

Nibatic

- Research project for Aube Nouvelle University (Bobo-Dioulasso): agricultural automation optimizing yield, quality, and water usage.
- Assistant to a senior web-technologies professor; taught support classes for first- and second-year students (web, JavaScript/TypeScript, Git).
- Built a parcel-delivery platform.

PROJECTS & OPEN SOURCE

layoros.com — 2025 - (Lead Frontend Developer)

Housing booking platform (short/medium/long term) across Africa, built with Next.js. Own the entire frontend and manage the frontend team. Pitched to numerous property owners in Burkina Faso; first landlords being onboarded.

fasocar.com — 2026 - (Mobile Developer · Infrastructure)

Road-transport booking service in Burkina Faso. Build and ship the mobile app and run the company infrastructure. Presented to most transport companies in the country: positive feedback, partnerships under discussion.

issgeo.com — 2025 (Freelance · open source)

E-school platform for publishing and recording online courses, with a full admin back office. Hundreds of weekly visitors during the launch phase.

Open-source libraries (github.com/DoniLite)

wrap (TypeScript backend framework on Hono + Drizzle), Mailify (Rust mail server), Anexis-Server (S3-compatible storage in Go), Mog (proxy load balancer), go-events...

SKILLS

Languages: Go, TypeScript / JavaScript, Rust

Mobile: React Native, Expo, NativeWind, Reanimated

Backend: Spring Boot, Node / Bun, Hono, Drizzle

Frontend: React

Infra & DevOps: Docker, Docker Compose, Coolify, Linux, SSH, mail servers (Stalwart), self-hosting

EDUCATION

Self-taught software developer

Higher education in communication — 2022 - 2023

Baccalauréat (high-school diploma), literary track — 2021
